

CPU Holders

The CPU is the second most important tool in your office next to your employees. Where do you put this important tool? The work surface is valuable space and the floor makes the CPU susceptible to dust, static electricity and the vacuum cleaner. The CPU is too important a tool to put on the floor. The CPU Support allows you to utilize the wasted space under the desk; the swivel and slide feature keep it accessible.

9650CP CPU Support - Black only

This CPU Support features 9 1/4" to 13 1/4" height and 5 1/2" to 9" width adjustments to accommodate most CPU sizes. It features a 360° degree swivel for rear port access. A 1 3/8" ball-bearing track can be mounted parallel or horizontal to the work surface.

9650CPS Small CPU Support - Silver only

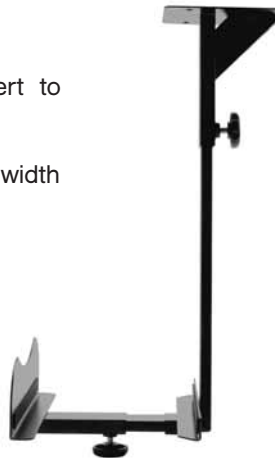

This CPU Support features 9 1/4" to 13 1/4" height and 3" to 5 1/2" width adjustments to accommodate smaller CPU sizes. It features a 360° degree swivel for rear port access. A 1 3/8" ball-bearing track can be mounted parallel or horizontal to the work surface.

9900CP Convertible CPU Holder

Simple assembly and adjustment. This unit will convert to accommodate vertical or horizontal CPU's.

- Vertical: adjusts from 15.5" to 20" height, 5.5" to 10" width
- Horizontal; adjusts from 7.3" to 11.3" height, 13.8" to 18.8" width

9950CP CPU Trolley

This versatile and cost efficient CPU holder protects the computer from dust and static electricity by raising the CPU from the floor. The four casters provide mobility for easy access to the rear ports of your computer. It adjusts to fit most CPU sizes.

9250CP Lock and Store CPU Holder

This lockable CPU holder with soft touch knob and lock has a load rating up to 85 lbs. It features a 360° degree swivel for easy rear port access. The Lock and Store adjusts from 3 1/2" to 9 1/3" width and 12 1/2" to 22 1/2" in height. This CPU holder is retractable on 18" glide track.

Mouse Attachments

ET4 "Lady Bug" and ET3 Mouse Attachments

The 400ET4 and 600ET3 solve the problem of bouncy mouse attachments.

These mouse attachments can retro-fit any 1/4" thick platform from most manufacturers. It is widely accepted by ergonomists that the mouse surface needs to be close to or on the same plane as the keys of the keyboard for maximum ergonomic comfort!

ET4 and ET3 mouse trays have a generous mousing area that is only 1/4" thick. A wire mouse guard is mountable in two positions for left or right handed users.

The ET4 and ET3 Slide-Lock® feature provides rock solid stability - it will not loosen up over time with heavy use. No tool is required to attach or switch from left to right side of the keyboard platform. Ideal for multi-user and corner work stations. Infinite front to back adjustments on either side of the platform. Choose from two different styles.

400ET4 "Lady Bug" Mouse Tray

Mousing surface sits 1/4" above keyboard platform.

600ET3 Elevated Mouse Tray

Mousing surface sits 3/4" above keyboard platform.

Mouse Attachments for Milan and Grand II Series

Teardrop shaped, these mouse surfaces are only 1/4" thick with a Micro-mousing surface. A wire mouse guard is mountable in two positions for left or right handed users. Choose from two different styles.

21450-S Swivel Mouse Attachment

21450-ST Swivel / Tilt Mouse Attachment

Round injection molded tray with movable mouse guard. Available in either clamp style for all Milan platforms or direct mount style for Grand II platforms. Adjusts from under keyboard to over 10-key with multiple positions in-between.

21455C FLEX Mouse Swivel / Tilt Attachment; clamp style - fits any Milan style keyboard platform

21455D FLEX Mouse Swivel / Tilt Attachment; direct mount style - fits any Grand II style keyboard platform
