

ET2 / ET3 Ergo Tray

It is widely accepted by ergonomists that the mousing surface needs to be close to or on the same plane as the keyboard keys. Most keyboard platforms have the mouse surface even with or below the keyboard.

The simple and intelligent design of our ET2 and ET3 *Slide-Lock* Mouse, patent pending, elevates the mousing surface above the keyboard surface. The *Slide-Lock* provides the most stable mousing surface of any system currently on the market.

No tools are required to attach or switch the mousing surface from right to left. The *Slide-Lock* mouse attachment is compatible with most 1/4" thick platforms. Platforms from other manufacturers can be retro-fitted to solve common mouse attachment problems.

3500ET2 Ergo Tray and Mouse Surface (shown with optional mouse palm rest 9550MR)

- Mouse tray adjusts without a tool with infinite mouse positions including left or right hand mousing
- Mousing surface is 1/4" above keyboard surface
- *Slide-Lock* provides rock solid stability!
- Large mouse surface with metal mouse bar and microfilm mousing surface
- Non-skid pads keep keyboard in place, gel palm rest for keyboard

3600ET3 Ergo Tray and Elevated Mouse Surface

- Mousing surface is 3/4" above keyboard surface
